Education

B.Tech in Information Technology 2024–2028
Jaypee Institute of Information Technology (JIIT), Noida
CGPA: 8.74/10 — Class XII: 91.6% — Class X: 93.4%

Experience

Bharat Heavy Electricals Limited (BHEL) May 2026 – Jul 2026
Software Development Intern, Corporate Digital Transformation (CDT)

- Developed a local Retrieval-Augmented Generation (RAG) assistant for document-aware question answering using LLMs.
- Designed document ingestion, semantic retrieval, and response generation workflows for enterprise knowledge management.
- Worked with mentors to build, test, and validate the solution, gaining practical experience in AI application development.

Competitive Programming

Codeolio — Profile 300+ problems solved across multiple platforms (290+ on LeetCode)

Projects

Collaborative Study Room *React, TypeScript, Node.js, Express, PostgreSQL, Socket.IO, JWT, Multer* GitHub

- Developed a collaborative web platform where students can create and join study rooms using unique room codes for shared study sessions.
- Built a React + TypeScript frontend with reusable components, room creation, dashboard, form validation, loading states, and error handling.
- Developed Node.js + Express REST APIs for health checks, request handling, room creation, and server-side validation.
- Structured the application for future real-time collaboration and synchronized study sessions.

Local RAG Assistant *Python, FastAPI, ChromaDB, SQLite, Ollama, JavaScript* GitHub

- Developed a full-stack Retrieval-Augmented Generation (RAG) assistant using FastAPI, ChromaDB, Ollama, and SQLite.
- Implemented document parsing, semantic search, chat history, streaming responses, and document management through a web interface.

Real Estate Data Scraper & Database Pipeline *Python, Selenium, MySQL, Web Scraping* GitHub

- Built an automated Selenium-based scraper to extract property listings from dynamically rendered web pages.
- Designed a normalized MySQL database schema and implemented validation and duplicate detection before data insertion.
- Automated the scrape, clean, validate, and store workflow to create a reusable data collection pipeline.

Skills

Languages: C, C++, Python, JavaScript, TypeScript, SQL
Web Development: HTML, CSS, React, Node.js, Express, FastAPI, REST APIs, JWT, Socket.IO, Multer
AI & Data: RAG, Ollama, ChromaDB, Pandas, NumPy, Selenium, Scikit-learn
Databases: PostgreSQL, MySQL, SQLite
Core CS: Data Structures & Algorithms, OOP, OS, DBMS, Computer Networks
Networking: TCP/UDP, Socket Programming, Client–Server Architecture, Wireshark
Tools: GitHub, VS Code, Android Studio
